## B8 [ CAR ]

BILSTEIN B8 gas pressure shocks and struts are designed for passenger cars using shorter static length springs (Lowered).

The performance-minded driver will experience absolute mastery of the road.

Models Include:

- B8 (SP)
- B8 (DampTronic®)

## B12 [ CAR ]

BILSTEIN B12 kits provide a lower stance and more stable ride for better road handling and control. Kit includes four dampers and four springs, specially tuned and matched to each passenger car application.

Models Include:

- B12 (Pro-Kit)
- B12 (Sportline)

## B14 [ CAR ]

BILSTEIN B14 kits offer a precise 30mm - 50mm range of adjustable lowered ride height and improved handling for passenger cars. It includes four performance-level dampers and four progressive rate springs.

Models Include:

- B14 (PSS)

## B16 [ CAR ]

BILSTEIN B16 ride-height and dampening adjustable kits are designed to lower the vehicle 30mm - 50mm while increasing performance for passenger cars. Kit includes four adjustable dampers and four progressive rate springs.

Models Include:

- B16 (PSS9)
- B16 (PSS10)
- B16 (ridecontrol)
- B16 (DampTronic®)
- B16 (IRC)

## BILSTEIN CLUBSPORT® [ CAR ]

The BILSTEIN Clubsport® features technology derived from Bilstein's race winning MDS double adjustable system and is the ultimate coilover suspension solution for both on-road and racing applications.

## 4600 SERIES [ TRUCK/SUV ]

BILSTEIN 4600 Series gas pressure shocks and struts are specifically designed to mount in the stock location of factory height light trucks, vans, SUVs, and Jeeps. An instant upgrade.

Models Include:

- 4600
- 4600 (Auxiliary)
- 4600 (Sport)
- 4600 (Comfort)
- 4600 (Steering)
