CLASSIC TRANSFORMATION

D.O.T. COMPLIANT | EXCLUSIVE TO TRUX

New LED Headlight Assemblies Made for the Modern Trucker in a Timeless Truck

TRUX's state of the art LED Projector Headlight Assemblies are the latest innovation for classic styled trucks seeking a modern new look.

TRUX has created an assembly with the highest grade of forward lighting; utilizing LED projector technology, which is twice as bright as standard LED headlights and four times as bright as halogen bulbs. The secret of LED projector technology is the powerful Cree LEDs that face the back of the light and reflect off a mirror to bounce a wider and stronger beam pattern forward.

Not only are these headlight assemblies incredibly bright, but they're unmatched in style as well. They're the first ever headlights for classic trucks to have LED white daytime running HALOs. Every car and truck owner loves the new white HALO look, and up until now, any truck similar to a Peterbilt 379 or Kenworth W900, didn't have this very cool feature.

Another new design aspect is the chrome faceplate integrating the high beam, low beam and turn signal into one assembly (driver and passenger side sold separately).

Current OEM 4" x 6" Headlight Configuration

Currently, a standard truck would have four individual 4"x 6" lights; two per side with a vertical metal bar in between (see picture above). Even though these headlight assemblies connect and install to your current wiring harness with four individual plugs, the front plate exposes a seamless and sleek design as if two lights transform into one.

Another first from TRUX, bringing your classic truck into the future, making safety and style look as bright and fresh as ever!

UNIVERSAL LED PROJECTORS
TLED-H100 (Chrome) - Driver
TLED-H101 (Chrome) - Passenger
TLED-H102 (Black) - Driver

“They’re the first ever headlights for classic trucks to have LED white daytime running HALOs.”

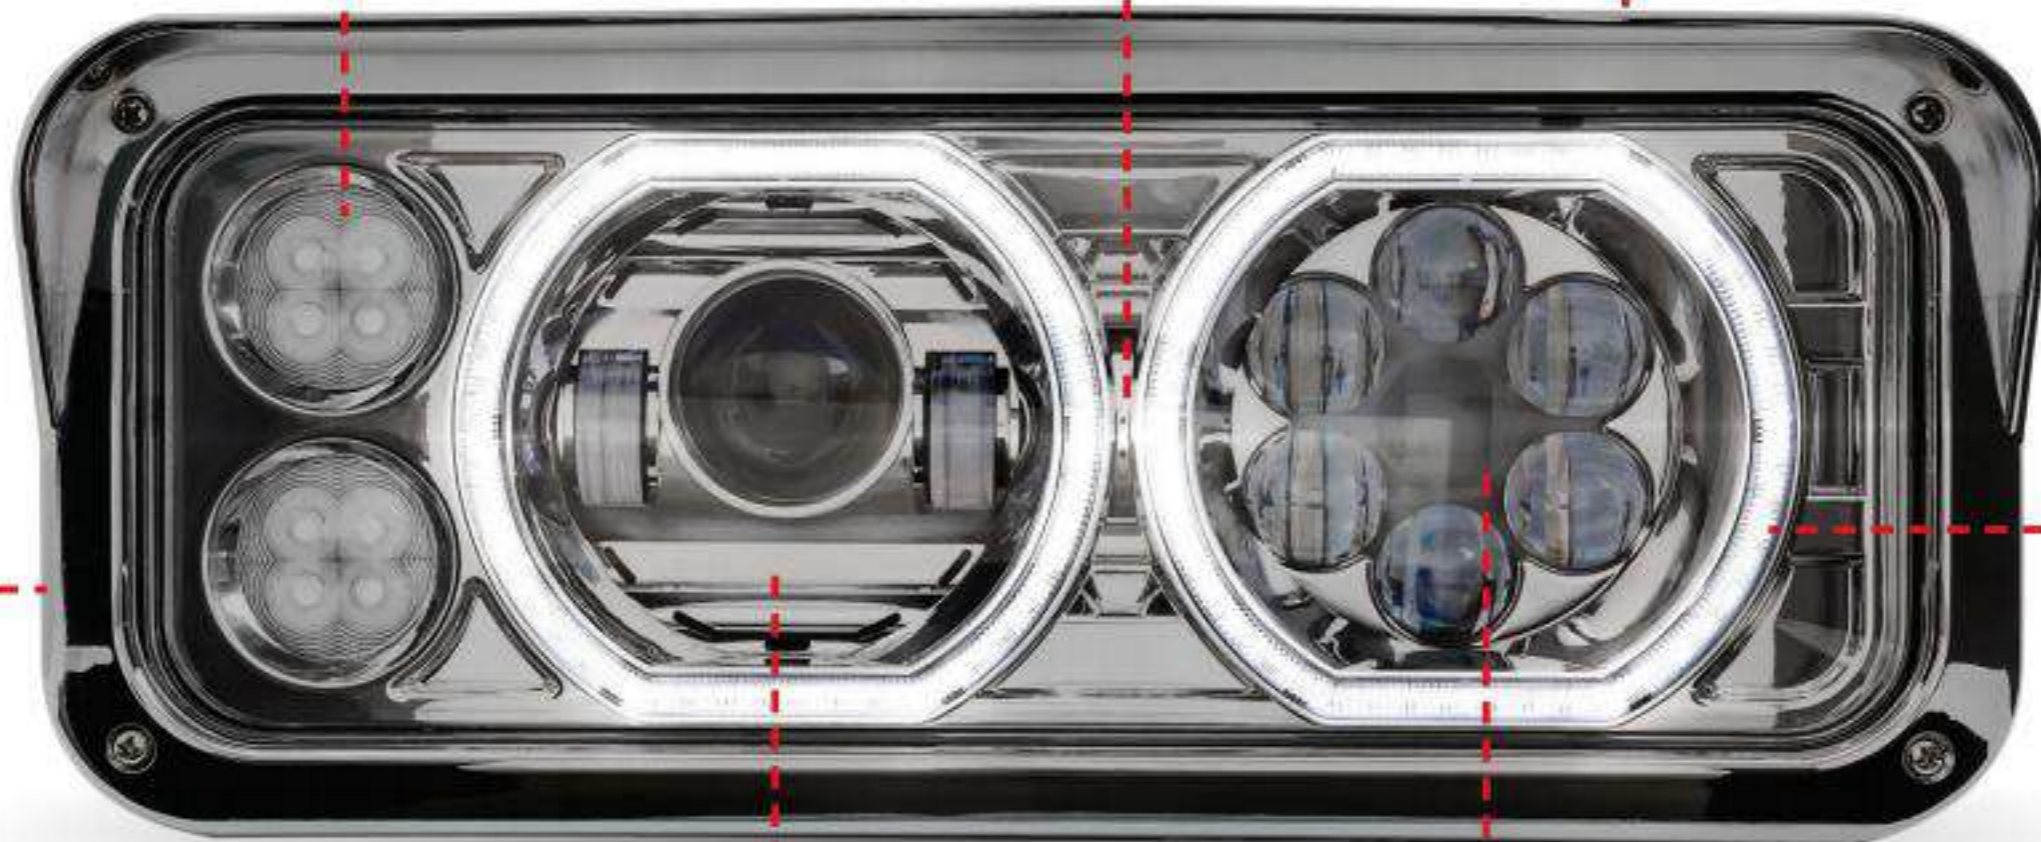

DESIGNED TO FIT

MAKE	MODEL
Peterbilt	357, 365, 378, 379
Kenworth	T600, T800, W900
Freightliner	Classic
Western Star	4800 Series, 4900 Series, 6900 Series

EXTRA SAFETY
 Two Amber Markers for Road safety.

SEAMLESS DESIGN
 No gap between the high/low beam headlights, offering a seamless style to your headlight.

TOP VIEW
 Integrated traditional visor for added style.

SLEEK BEZEL DESIGN
 Less screws and more chrome.

LOW BEAM
 1300 Lumens illuminating the journey ahead.

HIGH BEAM
 2000 Lumens for increased visibility when needed.

HALO ACCENTS
 White HALOs turn on with your daytime running lights.

THE FUTURE IS BRIGHT

HEADLIGHT ASSEMBLIES FOR AERODYNAMIC TRUCKS

At TRUX, we are always asking ourselves, "How can we make standard technology better and current designs more interesting and original?" It's this type of thinking that led to the creation of our new D.O.T. Compliant Volvo and Freightliner headlight assemblies.

The biggest and newest design feature is the LED strip accents found on the bottom of the headlight assemblies with dual function technology; white LED daytime running lights that change into an amber turn signal.

This dual function technology is found in many of TRUX Accessories' products known as the Dual Revolution Series. In addition, the Volvo series has two white daytime HALOs around its projectors as an added innovative factor that can't be beat!

These ground breaking headlight assemblies are designed with either standard halogen projector bulbs or powerful white LED projectors. You also have the choice to purchase them with either a black or chrome interior, depending on the look you are going for.

Installation is simple, as the dimensions of the headlight assemblies are made to OEM specifications with plug and play wiring. TRUX's new headlight assemblies completely change the appearance of your truck and make a statement that you're up-to date with technology and style.

Off-Road Use Only

PREMIUM GRADE

The TRUX LED projector headlights are simply the most powerful forward lighting in the entire industry. The shine from these white lights are unmatched and will substantially increase your visibility, not only straightforward but to the sides of the road as well. The secret of LED projector technology is that powerful Cree LEDs face the back of the light and reflect off a mirror to bounce a wider and stronger beam pattern forward.

STANDARD GRADE

TRUX standard grade LED headlights are perfect for owner operators or fleets looking for a headlight significantly brighter than the standard halogens on the market. The upgrade relies on the fact that LED headlights are more reliable, efficient and illuminate a bright white light in comparison to halogen models that illuminate a dim yellow light.

LED beam patterns are twice as bright and wide compared to halogen lights. Performance wise, when compared to other competitors in the market with similar grade headlights, we made sure that ours are the brightest, for safety reasons and... bragging rights.

ECONOMY GRADE

By popular demand, TRUX has created an economical level of LED headlights for those looking for safety while keeping money in their pocket.

This 4" x 6" model comes with high beam as well as the low beam integrated into one light, so you can now have four high beams running all at the same time.

This tier of headlights are NOT D.O.T. Compliant (they're actually too bright to pass) and are made for off-road use only.

LED HEADLIGHTS

A light emitting diode (LED) uses electric current to emit light through a semi conductor (two-lead) device.

HALOGEN HEADLIGHTS

Halogen headlight bulbs use halogen gas to react chemically with the tungsten that evaporates from the burning filament.

VISIBILITY

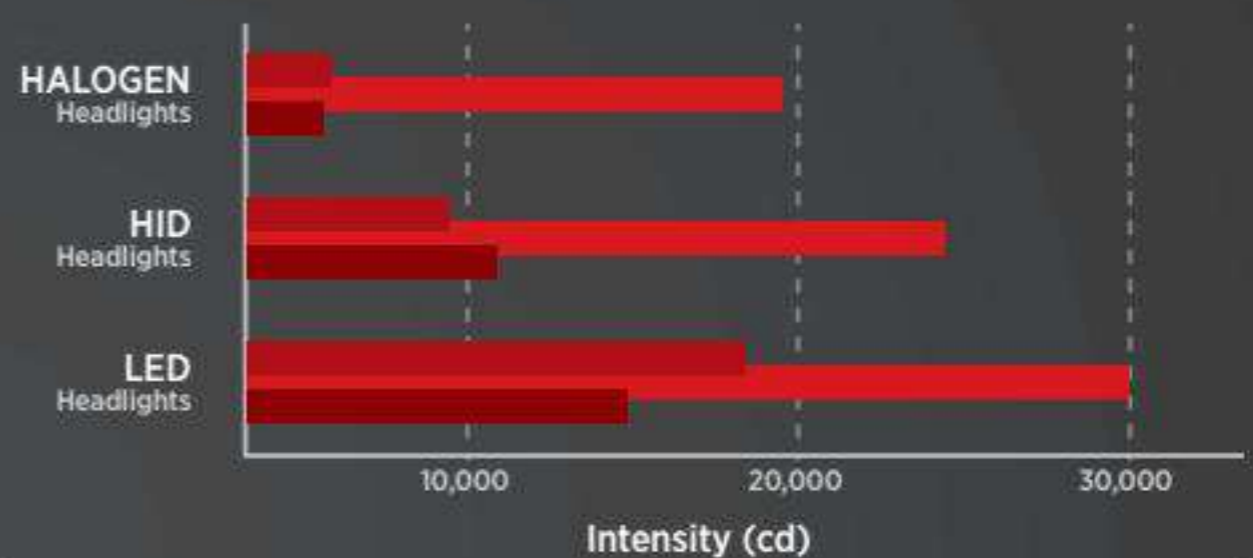

IF OTHER TRUCKERS CAN SEE THE DIFFERENCE, SO CAN YOU!

20% GREATER PERCEPTION OF BRIGHTNESS

Road tests have discovered that drivers, driving with LED lights perceived to see the road 20% brighter than driving with halogen lights.

LED HEADLIGHTS ARE THE MOST LUMINOUS

A comparison of photometric beam pattern intensity across 3 different test routes in Ann Arbor, MI.

COST

DECREASE YOUR DOWNTIME

Not having to change your headlight often decreases the downtime on the job.

UP TO 50,000 HOURS LIFETIME AVERAGE OF LED BULBS

UP TO 1,000 HOURS LIFETIME AVERAGE OF HALOGEN BULBS

CHANCES ARE YOU WILL BE REPLACING YOUR TRUCK BEFORE REPLACING YOUR LED BULBS

SAFETY

FEELING SAFER WHILE DRIVING AT NIGHT

OBSTACLES AHEAD

Several Road Studies indicate that LED Headlights improve the visibility of lane markings (white lines) and other hazards (pedestrians, road signs).

UPGRADE TO LED

- 20% GREATER PERCEPTION OF BRIGHTNESS
- MOST LUMINOUS IN THE INDUSTRY
- SAFER DRIVING AT NIGHT FROM IMPROVED VISIBILITY
- UP TO 50,000 AVERAGE LIFETIME HOURS
- UP TO 12x LESS ENERGY THAN HALOGEN

ENERGY

LESS ENERGY MEANS MORE LIGHTS!

UP TO 12X LESS ENERGY USAGE THAN HALOGEN BULBS

LED bulbs draw less energy from your truck than regular Halogen bulbs. Drawing less energy prolongs the life of your truck's starter, battery and alternator.

BIKE HEAVEN

FOLLOW THE LIGHT

Since the first HD Motorcycle rolled out of Milwaukee in 1903 we've been chasing a dream on the open road. A feeling that we can't describe but we know it has something to do with the wind in our face and the throttle of a v-twin in your right hand. Nothing stands between you and that feeling, but your leathers, the weather and how far your headlights can shine.

We at TRUX, live and breathe custom accessories, and enjoy the open road without a cage just like many of our loyal customers. While we can't control mother nature and the road blocks she throws our way, we can however, light your path to freedom like no one else can!

Trux LED Projector Headlights will out perform traditional halogen headlights as they're four times brighter, as well as, two times brighter than the current LED headlights in the market. TRUX LED headlights use more projectors to make a wider beam pattern that lights up both lanes, ditches and your side view.

We all know the greatest risks while enjoying the open road are the things we don't see until it's too late. TRUX LED headlights will illuminate the roadside and the road in front of you more than your current lights will ever do.

LED headlights for motorcycles aren't a new thing. LED headlights for motorcycles that actually work well, ARE A NEW THING! Traditional LED headlights marketed to motorcyclists have hard lines and shadows in the beam pattern. We eliminated those annoying dark spots with our new series of headlights. Other manufacturers may limit you to one color reflector...TRUX says no-one limits my motorcycle... we offer our lights in black reflector for the true blacked out look or chrome reflectors for the chrome junkies of the world. By offering such a wide variety of models that fit Harleys, Honda, Yamaha, Indian, and many others, you're sure to find a LED headlight in the TRUX lineup that will make your ride safer, more fun, and ultimately the brightest part of the road!

All of TRUX's 7" Round LED Headlights have a high and low beam pattern integrated into one light, enabling you to see the road ahead with much more clarity and vision; allowing you to adjust quickly to any situation. The TRUX team also designed these headlights to have a White Auxiliary Accent, adding style to an already superior headlight.

So start your next adventure at peace, knowing full well that a motorcycle fitted with a TRUX LED headlight, is like a bike from heaven.

TRUX LED WORK LAMP

COLLECTION

THE DIFFERENCE

Halogen vs LED Work Lamps

Work lamps are a common necessity that light up your workspace. Not so common is finding reliable work lamps that work every time you turn them on. It's time to upgrade with TRUX Accessories' LED models and finally replace your frequently burnt out incandescent work lamps...for good!

Allowing you greater visibility with brilliant white light, TRUX's LED Work Lamps are available in many different sizes and light output levels, fitting your needs and budget.

All LED Work Lamps are IP67 waterproof, shock proof and designed with aluminum die cast in order to withstand extreme conditions.

Suitable for any truck, work and equipment vehicle, ATVs, RVs, boats and yachts.

FEATURES & BENEFITS

LEDs illuminate white **Flood or Spot Beam**, reducing eye strain

Polycarbonate Lens providing great clarity with stronger durability than glass

High Rigid and Efficient Cooling **Aluminum Die-Cast Housing**

IP67 Waterproof up to 1m of water for 30 minutes

Adjustable **Stainless Steel Mounting Brackets** offering the flexibility to adjust the lighting

Work Lamps are compatible with **12v-24v Vehicles** (unless specified)

Commonly used for **Trucks, Off-Road Vehicles, SUVs, UTE, ATV and Equipment Vehicles**

THE BEST & BRIGHTEST

MORE LUMENS THAN ANY OTHER

The TRUX Super Powered Oval LED Work Lamp will definitely keep the monsters away. These lights are the brightest work lamps in the industry. With 5400 lumens, this light will have you seeing up to 1150 feet!!

A spot beam so bright you will be able to back up at ease and work in the darkest situations and feel like it's a sunny day.

PART NO.	DESCRIPTION	LEDS	LUMENS

TLED-U46	2.5" x 4.5" Mini LED Flood Work Lamp	6	1200

GOOD THINGS IN SMALL PACKAGES

Size is not always what matters. The mini LED work lamp series from TRUX allows you to see more, with greater flexibility to install in tighter places.

These LED work lamps are anything but a downgrade when it comes to quality and design, made with the same aluminum die cast housing and polycarbonate lens that is found on all TRUX LED work lamps.

900/1200 lumens and 5/6 diodes never looked brighter!

LED WORK LAMPS IN DISGUISE

TLED-U16

TLED-U17

PART NO.	DESCRIPTION	LEDS	LUMENS
TLED-U16	4" Round Flood Work Lamp with Bubble Lens and Reflector Cap	6	600
TLED-U17	Oval Work Flood Lamp with Bubble Lens and Reflector Cap	6	600

Includes Standard 3 Prong Pigtail

Looking to replace your back-up light and don't have any room for bulky work lamps with brackets? No need to look any further, as TRUX has the solution that will have you seeing three times more than any LED back-up light.

The design of TRUX's 4" round and oval grommet work lamps replace the need for a back-up light, fitting into any standard 4" round or oval grommet; allowing you to see up to 131 feet with 600 lumens of pure white light.

Did we mention there is no special wiring? Simply plug n' play by replacing your current back up light with TRUX Grommet Work Lamp.

RAISING THE BAR

WITH FRESH NEW STYLES

TRUX'S LED LIGHT BARS

TRUX's brand new line of LED Light Bars are anything but common. Anybody can buy any boring light bar, from just about anywhere. But if you're looking for anything but ordinary, then you should check out TRUX's new LED Light Bar series.

TRUX's rugged Light Bars offer superior visibility and durable performance for any heavy-duty truck, pick up, off-road and work equipment vehicle. All LED Light Bars come with wire harness switches, relays and mounting brackets in one box, for a complete and easy installation.

Only the TRUX brand can light your way to the top and guarantee heads turn as you drive by with any of the following models (see following page).

FEATURES & BENEFITS

-  Cool Daylight Enriched LED **6000k Color Temperature**
-  Adjustable **Heavy Duty Aluminum Mounting Brackets** offering the flexibility to adjust the lighting
-  Unique Light Bar **Spot/Flood** LED beam patterns
-  **Polycarbonate Lens** providing great clarity with stronger durability than glass
-  **IP67 Waterproof** up to 1m of water for 30 minutes
-  Life Span of **Up to 15,000 Hours**
-  Light Bars are compatible with **10v-30v Vehicles** (unless specified)
-  Commonly used for **Trucks , SUVs, Off Road Vehicles, UTE, ATV and Equipment Vehicles**

LIFE OF THE PARTY

Be the life of the party with TRUX's Multicolor Light Bars. The beauty of these light bars is the huge variety of colors and lighting effects that can be controlled from a Bluetooth app that can be easily downloaded to your smartphone (Android or Apple).

So enjoy off-roading with a white clean powerful light and then hit that party with your own colorful light show. With these multicolor LED Light Bars, you're guaranteed to be a #1 hit!

Light Bar with LED Cover

Light Bar with Cover

THE COVER UP

D.O.T. and Police have started cracking down on vehicles with exposed light bars due to the rebels in our society, who disturb the peace by turning on their powerful lights in urban areas.

This led TRUX to create an LED Light Bar series with an adjustable cover. What makes this cover so remarkable is that it is permanently attached to the bar; therefore it does not clip off and have to be stored away. The intelligent design and locking pins, makes opening and closing the cover quick and easy. Oh ya, did we mention we made selected models with LEDs embedded inside the cover?!

These models have a thick strip of LEDs creating a warm inviting white light so you can light up a campsite and not blind everybody around you.

TRUX ACCESSORIES
2017 SHOW TRUCK

ATTENTION!

THE GENERAL

Introducing "The General" by TRUX Accessories; our 2017 show truck built as a tribute to the military and all that it stands for. It's recognition of the hard work, sacrifice and honor for our men and women in uniform. It also signifies military grade; the highest possible quality for parts, which is a standard TRUX strives for.

Since September, the TRUX team led by Josh Foster, in collaboration with K&W Truck Repair, has been working long hours to complete this frame off build. The body of the truck has received a serious facelift. The original 72" Aerodyne sleeper was replaced with an 86" studio sleeper. We also had Valley Chrome build a custom bumper and installed TRUX's HALO LED Light Bar; in addition, we added Dual Revolution load lights to the back of the sleeper, a flush mount deck plate and extensions to the bottom side fairings.

"The General" is the one and only Kenworth T660 full Aero package with side skirts to have side mounted stacks. Sounds impossible but with TRUX, anything is possible! By merging Kenworth parts and Peterbilt elbows together we were able to make a functional exhaust system that not only works with, but compliments the factory mounts, brackets and fairings.

As if that wasn't enough, TRUX Accessories has been working with Rockhard Powder Coating on producing a new limited line of trim accessories with black powder coating. You'll notice that every piece of aluminum, and stainless on "The General" has been powder coated in a flat black armor type coating. In the last few years, show trucks owners have taken their stainless trims and painted them, which possibly led to paint chipping due to the paint not sealing well on stainless. Alternatively, owner operators have utilized fiberglass painted pieces that didn't allow many trims to be compatible for their truck. Stainless pieces may have lost their shine and luster but they didn't lose their unique appearance. The idea of using black powder coating on stainless allows for your part to have longevity and more variety than fiberglass components.

To go with the TRUX blackout stainless trims and panels are the brand new Black Raven Dual Revolution LED Series that also have a blacked-out finish. These Dual LEDs go from D.O.T. regulation to different colors, (such as green, purple, & blue); an extreme look that will have your friends agreeing that you now have the most badass truck around!

NEW BLACK RAVEN DUAL LEDS

"The General" will always respect the law with the amber or red D.O.T. functions but when he is at ease at a show or truck stop, you will be able to see his true color, GREEN, with the flip of a switch.

The paint color by Twins Body Shop and decals by Dynamic Design are what binds the look of the truck, clearly stating TRUX's message of reinforcing military grade quality. Most importantly, this show truck is a sincere tribute to all of our military personnel who have fought so heroically for our rights, freedoms and security. A lesson we cannot forget!

THE DUAL REVOLUTION COMBINATIONS

BACKUP WITH CONFIDENCE

Why you should have Trux's Dual Red Stop, Turn & Tail and White Back-Up All-In-One Light!

RED STOP, TURN & TAIL TO WHITE BACK-UP SERIES

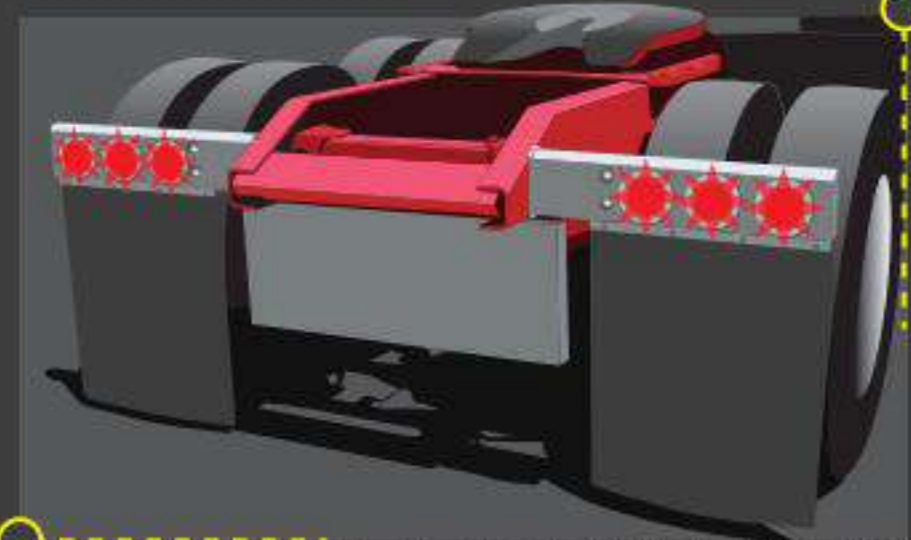

Trux's Innovative Dual Revolution technology is the first D.O.T. Approved in the industry to offer the dual function of Red Stop, Turn & Tail and White Back-Up. Simply install and allow yourself to have twice as much visibility than any standard LED.

AESTHETICS

The 4x40 allows for a uniform look for the back of your truck that cannot be achieved with any other lights in the market. At a red light, standard lights have 4 working red lights and two back up lights turned off. With the 4x40, drivers will see all six of your tail lights in bright LED red.

THE OLD WAY

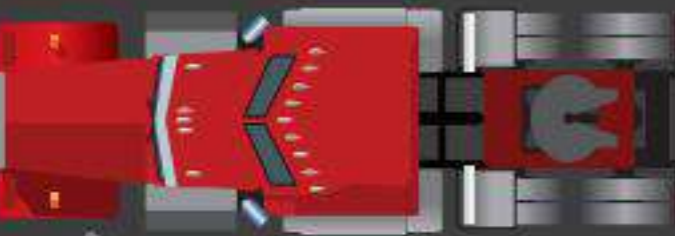

THE TRUX WAY

BRIGHTNESS

Every driver is looking for more white back up lights when reversing, which is a major reason why LED work lamps are so popular. Standard light configurations only allow for 2 working back up lights; whereas, the 4x40 offers twice as much white light with 4 back-up LEDs. In addition, drivers are opting to use our flange mount version on the back of their truck cabs, when they hook up a trailer at night, or any other task where extra white light may be required.

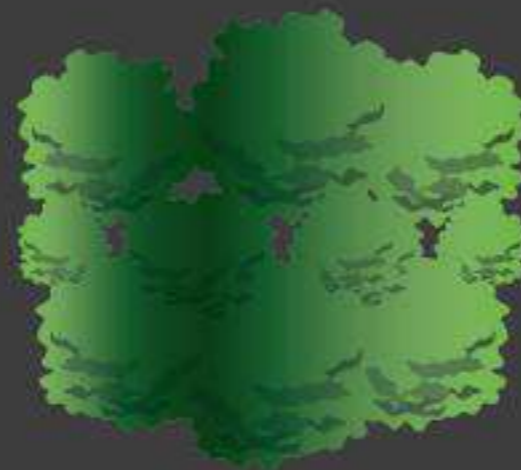

2 x Standard Back-Up Lights

REVERSING

THE OLD WAY

4 x Dual Revolution LEDs (TLED-4X40)

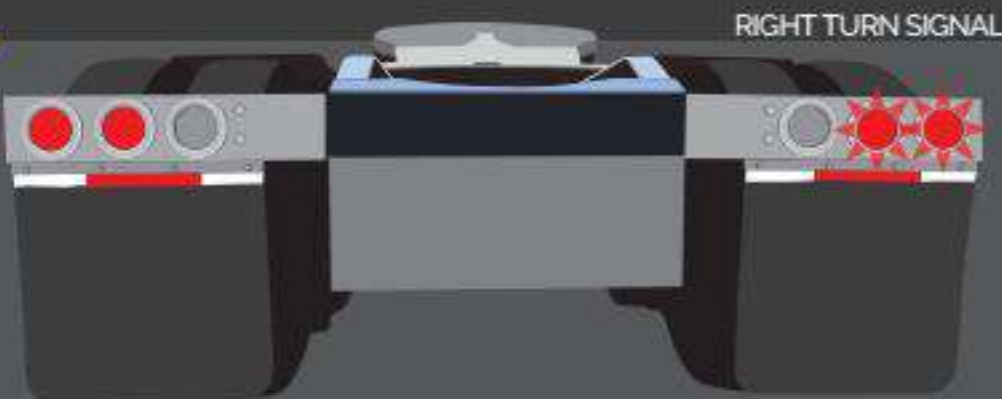

REVERSING

THE TRUX WAY

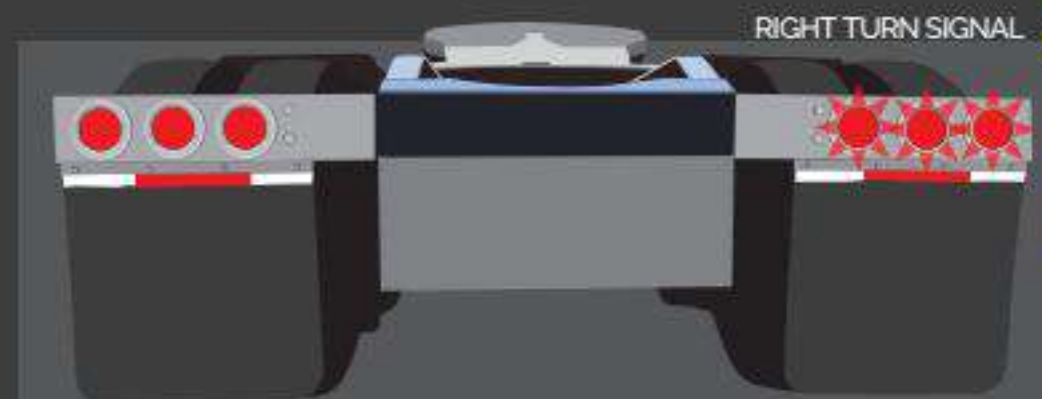

SAFETY

A turning signal has never been so clear with the 4x40 providing a clear indication to other drivers as there are now 3 lights blinking instead of two! Making road conditions for you and other motorists safer.

RIGHT TURN SIGNAL

BAND OF BROTHERS

PETERBILT 379

“Sean may have been wounded but his strength and perseverance is what made him find a platform to speak for himself and fellow soldiers”

GETTING TO KNOW THE DRIVER

There are not many men like Sean McEndree. This man has been through so much, and has seen more than any civilian will ever encounter, yet he still remains very humble.

Most people would protest “War, War what is it good for” and then you talk to someone whose been there and that’s when you realize for them it’s not a war, it’s a chance to make a difference. It’s a chance to protect innocent people from the enemy. This all comes with a heavy price that he and many other fellow soldiers experience when returning from a battle. For some, it means their lives, for others, physical injuries and for most, Post Traumatic Stress Disorder (PTSD).

Sean McEndree’s mission was to serve and protect, something he took very seriously and heroically. Unfortunately, on April 9, 2004, when dismounting his convoy, his platoon was ambushed and a road side bomb detonated, changing Sean’s life forever. He sustained several life threatening injuries, but with the help of a Medic Pilot (MP), he was medevaced to have an important surgery that saved his life.

Since then, his mission changed to embracing life and educating civilian people on the after effects of war. For Sean, it’s to tribute his fellow soldiers by raising awareness of PTSD.

He expresses his message everyday while driving his 2006, Peterbilt 379, Band of Brothers truck. The detail and design on this truck has so much meaning. For example, the purple heart placed on the hood of the truck is a personal homage to Sean and other wounded soldiers who received this award for being wounded in combat. Dan Brown from DB Kustoms has brought Sean’s inspiration to life, with 7 months of restoration to create this beauty.

Band of Brothers was an extreme restoration from exterior to interior. The exterior light show is definitely eye catching with TRUX Dual Revolution technology, allowing the truck to go from D.O.T. red/amber to purple at the flip of a switch.

The Dual Revolution LEDs are found on the entire exterior of Sean’s truck, even underneath, giving the effect that the truck is on a purple stage. TRUX never thought of making D.O.T. to purple auxiliary LEDs because we had just come out with the blue duals and were waiting to see if people would like them; therefore, Sean propelled the idea for TRUX to develop a purple series, which has now morphed into a green series as well.

The Band of Brothers truck is equipped with TRUX Dual LEDs, as well as the LED projector headlights with HALO accents. Not only are these stylish headlights more efficient, but the projector component allows for broader visibility. This allows the driver to see any obstruction on the shoulder of the road and avoid any unforeseen collisions.

Overall the Band of Brothers has everyone's attention with accents of stainless trims that just highlight the contour of the windows, lights, exhaust and bumper. The purple full double hump fenders and purple LED skirt kits are essential elements that don't overpower the mural that adds to Sean's powerful message about PTSD awareness.

Sean may have been wounded but his great strength and perseverance is what made him find a platform to speak for himself and fellow soldiers. The Band of Brothers is not his 1st restore. He had two others (Fallen Heroes and Fallen Heroes II) that were also tributes to his time in the war.

Sean would like to thank everyone who has contributed in making his dream come to creation, He couldn't have done any of this without the support of his family and sponsors.

Awards

LOUISVILLE:
 Winner - Working Class Interior
 Winner - Louisville People's Choice

MICHIGAN GREAT LAKES TRUCK SHOW:
 Winner - Best of Show Working Bobtail
 Winner - Bobtail Working Intense Custom

THE TRUCKER'S GUIDE OF THE FENDER UNIVERSE

STAINLESS STEEL FENDERS

Bring some shine to your truck, with TRUX's stainless fenders. Among many options to choose from, you are sure to find the right size, gauge and finish made essentially for you!

Affordable Stylish Fenders that will bring shine to your truck

Surface scratches can be polished off easily with metal polish, not like steel or aluminum painted fenders that easily chip

Mid-Range Initial Expense however reduces fuel consumption due to their aerodynamic design

Stainless Steel Fenders **will not rust** and will **improve driving conditions** by suppressing spray from road debris and water

NEW ADJUSTABLE MOUNTING BRACKET

EASY INSTALLATION

The adjustable mounting bracket is designed for easy installation and avoids any tension that can be encountered when installing. The fender will stay in a neutral state, whereas the bracket can rotate to meet the fender, avoiding any dimples that can lead to a cracked fender!

TFEN-A54 9" Mounting Bracket
TFEN-A58 4" Mounting Bracket

POLY FENDERS

TRUX's Indestructible Poly Fenders are made for extreme conditions. Tested and true to their durability the Poly Fenders are chemical, rust and dent resistant. TRUX's rigid Poly Fenders endure intense weather without any strain or damage. Built to last and to diminish spray, keeping your truck in style while providing superior driving conditions.

Little Maintenance is required due to its durability to withstand salt and corrosion. Simply wash with mild soap and water

TRUX's Poly fender robust design is made to **withstand the nastiest conditions**

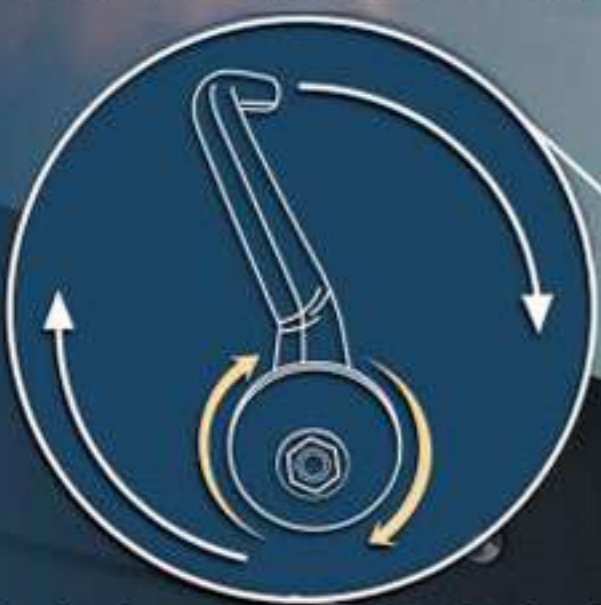

TRUX Poly Fenders are considered the "**Bang for your buck**", initial low expense and is lighter than steel and aluminum, cutting fuel consumption tremendously

Rigid Polyethylene that will **not dent, nor rust** and is designed to **resist chemical spills and UV Rays**, in which quality has been tested and sustained in various climates (-57°F / 176°F)

Adjustable Bracket

Rotates to meet the fender

ROAD BULLY!

Intimidating Performance

Most truck owners would agree there is nothing like a set of Stacks to make a truck appear intimidating and aggressive.

Not only is look important when it comes to stacks, but quality matters. The TRUX Exhaust line starts off the manufacturing process with high grade steel which is then put through the world's only automatic polisher to create the smoothest stack ever. This is a super important step before dipping them into triple nickel chrome, as the smoother the surface, the better the chrome adheres.

Designed to withstand all harsh weather conditions, TRUX's stacks and clamps are fabricated with High Quality Chrome, offering a mirror shine and uniform look.

The TRUX's Exhaust line also offers convenient complete stack kits; in all sizes and models. Sold as a complete kit, pair or individually, TRUX Accessories offers the option to customize your truck from Top Stack to Elbow in any way you want.
