# Better-than-NOS Radios!

1967-68

## Camaro and Firebird

Why settle for a cheap modern radio that's sort-of-made to fit, or install a hidden audio system when you can have the real thing plus so much more? Our new radios have the look and feel of the original radio, but with the performance you expect from today's technology. Shown above is a 1967-68 Chevrolet Camaro or Pontiac Firebird radio. From the dash every piece you see has been designed to match the original. We paid meticulous attention to detail. For example, the thread and diameter of each shaft bushing is the same as was used originally. The dial fonts are exact duplicates. The dash bezels are die cast. Our Wonderbar radios seek up the dial until they reach the top, then return rapidly to the bottom and start over just like the originals did. The tuning knob and pushbuttons make the dial pointer move the way they're supposed to. No digital displays here! Behind the dash it's a different story. Powerful electronics are built into a chassis that is only 2-1/2 " deep, making some of these radios only 10% of their original size! **Does size matter?** There is room for electric wipers and/or air conditioning! All radios have RCA inputs for Ipod, MP3 or XM options. Radios with push-buttons have 10 presets (5 AM and 5 FM) When an OEM AM/FM radio wasn't offered, the dial background is subtly printed with the FM dial scale. Inside the case is our proven digital tuner system with a 180 watt RMS power amplifier! Two powerful microprocessors monitor the "human interface" (knobs & pushbuttons) and, through the magic of software, make the radio dial imitate the original while pumping out a sound that is cleaner and much more powerful than the best radio that was available when your car or truck was new! In stock now: All 1947-59 Chevrolet and GMC Truck radios, 1951-52 , 1955, 1956, 1961-62 Chevy Car, 1957, 1958 Chevy Wonderbar, all 1958-62 Corvette radios, 1966 GTO, 1967-68 Camaro and Firebird, 1969-70 Chevy 1969-72 Chevelle, 1969-76 Camaro and Nova. We are tooling many more hard-to-find radios. Watch our website or call for more information. Ask about applications for cars and trucks with 6 volt systems. European channel spacing optional on all models. Each radio comes with a detailed instruction booklet. **Designed and manufactured in the USA by American workers**—just like your car or truck was!

↔**1947-53 Chevrolet or GMC Truck Radio.** 10 presets (5 AM, 5 FM), Chevrolet has white numbers. GMC has red dial numbers. 12 volt, up to 4 speakers, 180 watts RMS. RCA inputs!

**1955 2nd series thru 1959 Chevrolet Truck Radio.** Up to 4 speakers, 180 watts RMS. Balance, Fader, RCA inputs! Doesn't require as much depth behind the dash as the ashtray, so there's room for electric wipers!

↔**1947-53 Chevrolet or GMC Truck Dash Speaker System.** Includes two 5x7" 3 way speakers, all wiring for easy installation (Dash light, Hot lead, and rear speaker wiring that can be used to add two more speakers in the kickpanels, behind the seats or in the doors). All hardware and instructions.

↔**1956 Chevrolet Radio.** Black plastic push buttons look and feel just like the original ones! 10 presets, 4 speaker 180 watt amplifier! RCA inputs.
