# 4 Things You Should Know About BECK/ARNLEY

# 1

## Genuine OE Quality

Beck/Arnley provides **OE Quality** parts that perform like OE parts:

- Form** - ensure that the materials and weights are correct
- Fit** - ensure that a part has the precise measurements
- Function** - ensure that the part does its job

# 2

## Part-by-Part Sourcing

Beck/Arnley provides OE quality parts from around the world, including from over:

- 50 countries
- 400 manufacturers
- A database of over 800 sources

# 3

## Product Enhancements

Beck/Arnley provides enhancements to OE quality parts to help with installation:

- Assemble "Kits/Sets"** - i.e. Tie Rod End & Boot Kit
- Protection** - i.e. cover rubber boots to prevent damage
- Add components necessary for install** - i.e. grease, nuts, washers, etc.

# 4

## Vast Coverage

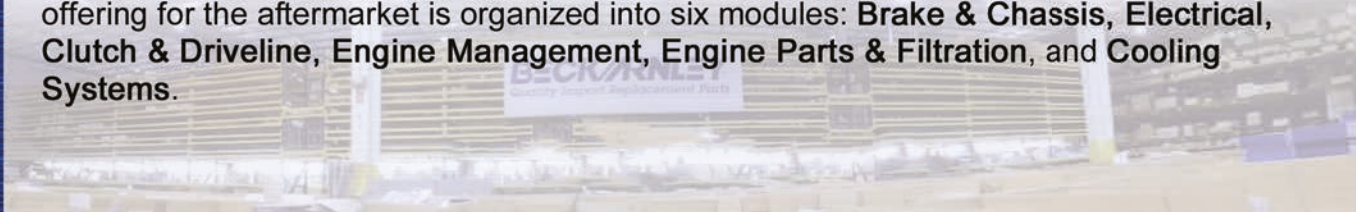

Beck/Arnley has outstanding coverage on most import vehicles:

- 23,000 parts
- 80 makes
- 1,800 models

## Company Overview

Exclusively dedicated to supporting the repair market for import vehicles, the Beck/Arnley® brand is a leading specialty supplier of premium, quality parts for cars, light trucks and SUVs. Unlike others, we are committed to meeting our promise to provide the import parts by model and year to equal OE form, fit, and performance. Beck/Arnley's broad product offering for the aftermarket is organized into six modules: Brake & Chassis, Electrical, Clutch & Driveline, Engine Management, Engine Parts & Filtration, and Cooling Systems.

## WE SEARCH THE WORLD FOR THE *RIGHT PART* SO YOU DON'T HAVE TO

Whether Asian or European vehicles, Beck/Arnley provides OE quality parts from around the world, from over 400 manufacturers working with a database of over **800 sources**. Beck/Arnley product specialists and **experienced sourcing experts** follow a unique research, analysis and procurement process known as Application Specific Sourcing. Using proven global sourcing expertise, we source parts that meet the **form, fit, function and performance of OE**.

**Example:** Engine Mounts

**29** Unique Suppliers in **14** Different Countries

# Covering Your IMPORT

## 2005 Honda Civic

**213**  
Parts Available

Engine Parts & Filtration	51
Brake & Chassis	96
Clutch & Driveline	14
Cooling Systems	6
Electrical	14
Engine Management	27
Genuine OE Quality Fluids	5

**Popular Parts:** Extended Life Blue Coolant/Antifreeze (252-1501)  
Disc Brake Rotor (083-2252)  
Ignition Coil (178-8358)  
Timing Belt (026-1055)

## 2008 Volkswagen Jetta

**112**  
Parts Available

Engine Parts & Filtration	27
Brake & Chassis	48
Clutch & Driveline	6
Cooling Systems	7
Electrical	7
Engine Management	13
Genuine OE Quality Fluids	4

**Popular Parts:** Fully Synthetic Hydraulic Fluid - FS11 HF (252-0028)  
Control Arm (101-6270)  
Engine Water Pump (131-2437)  
Valve Cover Gasket (036-1741)

## 2002 Lexus RX300

**120**  
Parts Available

Engine Parts & Filtration	39
Brake & Chassis	48
Clutch & Driveline	2
Cooling Systems	2
Electrical	11
Engine Management	13
Genuine OE Quality Fluids	5

**Popular Parts:** Automatic Transmission Fluid Type T-IV (252-2002)  
Cabin Air Filter (042-2027)  
Foreign Branded Brake Pads (089-1311)  
Wheel Bearing (051-4119)

NOTE: Adding parts is a monthly process. The "parts available" are continually increasing.

# Product ENHANCEMENTS

## PREMIUM

The Original Import Brand Since 1914

The Product Management team at Beck/Arnley thinks of the needs of the service technician first. They evaluate OE parts for each vehicle model and year and determine the quality standards needed for maintenance and repair work. As automotive vehicle professionals, the Beck/Arnley Product Managers seek out finished goods or assembled kits to cover the basics of the installation and make improvements when possible.

### IGNITION COIL BOOTS

Beck/Arnley offers an alternative not available from the OE dealer. The ignition coil boot allows you to replace the boot only on "coil on plug" technology engines. Currently, the complete coil is the only alternative from the OE dealers. These new ignition coil boots, some including the resistor, are available from Beck/Arnley at a fraction of the cost of a new coil and boot assembly.

### ELECTRIC FUEL PUMPS

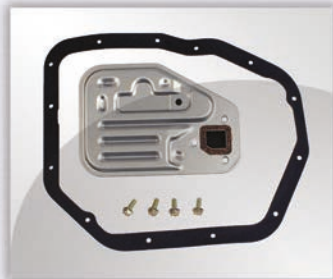

These are typically one of the largest warranty issues because of premature failure due to not replacing the pre-pump strainer. We provide a kit with new electronic fuel pumps which includes a new strainer and any necessary hardware and hoses (where applicable).

Beck/Arnley's fuel pumps are an exact match, not a universal fit. There are NO splicing wires or connectors. NO rerouting fuel lines or changing fittings. In addition, sock filters are included with the pump where used and available.

### STABILIZER LINKS

All stabilizer links come with attaching hardware. Lock nuts are used for all applications. This is because old nuts are often rusted and threads strip during removal.

### TRANSMISSION FILTER KITS

Beck/Arnley's filter kit gaskets are made from NBR rubber for flexibility in climate changes. They hold up better in heat and cold, and there is less chance of leakage. In addition, bolt holes are smaller to help the technician during installation. This helps hold the bolts in place.

*Product team working to determine the needed enhancements to make the installation of a particular part easier on the technician.*

# Built for Ease SETS & KITS

# PREMIUM

The Original Import Brand Since 1914

Beck/Arnley offers "sets" or "kits" of certain products in order to make the tech's job easier. These kits include everything that is necessary for the job including grease packs, washers, o-rings, any necessary hoses or hardware etc. You don't have to purchase everything individually, like you do at the dealer. We make sure you don't have to fool with finding the nuts and bolts.

# BRAKING™

FAMILY OF PRODUCTS

# PREMIUM

The Original Import Brand Since 1914

## TRUE | FRICTION™

Brake Pads

-  **OE Material Matching** Specifically designated to MATCH OE friction material type.
-  **True Fit** Precision cut edges to ensure a true fit for each vehicle application.
-  **Minimal Dust** Based on OE friction material type, formulated to minimize brake dust.
-  **Sound Suppression** Chemically and mechanically bonded shims help eliminate braking noise.

## TRUE | METAL™

Rotors & Drums

-  **Directional Finish** Optimizes break-in and pad seating while preventing unnecessary noise.
-  **High Carbon Content** Maximizes thermal conductivity while minimizing distortion & cracking.
-  **Top Coat** High temp coating on exposed surfaces improves appearance and life.
-  **Tight Tolerance** Enhances brake system performance while protecting ride quality.
-  **OE Cooling Vanes** Engineered for optimal air flow and cooling with exceptional performance.

## TRUE | CALIPERS™

Semi-Loaded Calipers

- Mounting Bracket Where Applicable
- 100% Pressure Tested To Ensure Leak-Free Performance
- Noted on Label If Caliper Comes With Bracket.
- Hardware is included so all you need is friction

## TRUE | SHOES™

Brake Shoes

- Coated Steel for Rust Protection & Long Life
- All New Steel - NO USED CORES
- Friction Material is a low metal formulation with drum friendly properties.
- Performance Test engineered for safe stopping. North American Dyno and SAE2521 tested.

## Engine Mount Supremacy

### ENGINE MOUNTS

★ A Top Selling Product

- Because Engine Mounts are so individually unique, Beck/Arnley has an advantage over the competition.
- We specialize in part-by-part sourcing. We make sure each Engine Mount matches the one you took off your vehicle.

## Take Control

### CONTROL ARMS

- Direct OE replacement.
- New hardware and bushings included where applicable.
- Complete with ball joint unless otherwise noted.

### OE MATCH

- Some companies take shortcuts, compromising a perfect fit and OE quality.
- Beck/Arnley is about making the right cuts, not the shortcuts.

## Always OE Quality

### Can You Find the Match?

# Engine MANAGEMENT

## SENSORS

Beck/Arnley sensors are the best alternative to the dealer. All sensors match OE's fit, form, and function.

Take a look - touch or feel them, they are OE Quality. Trust your **senses** when it comes to **sensors**.

## IGNITION COILS

Beck/Arnley offers not only the Ignition Coil Assembly but an alternative NOT available from the OE dealer, the ignition coil boot.

Some repairs only call for the Ignition Coil Boot are available at a fraction of the cost of a new Coil Assembly.

## IGNITION WIRES

Wire Sets are cut to precise length.

The 5mm, 7mm, and 8mm wire sets are per manufacturer's specifications.

Ignition Coil

OR

Just the Boot

## FILTERS

Oil Filters, Air Filters, Cabin Filters, Fuel Filters, Transmission Filter Kits

- Leading coverage for latest model years 1995 to Present
- Additional difficult-to-find filters are available
- Analyze the latest vehicle data to make sure to deliver the best import coverage
- Always provide OE form, fit, and function for filters
- No consolidation of parts unless OE driven

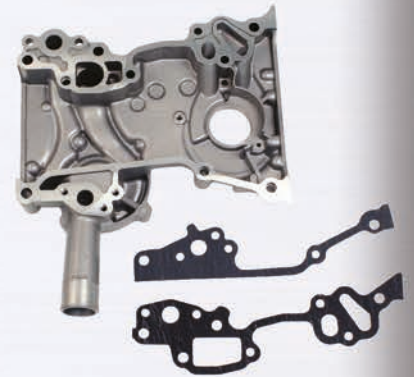

Timing Tensioners & Components, Timing Gears, Timing Belts, Timing Sets, Timing Kit Gaskets

## TIMING

### Timing Kits

#### All The Components You Need To Get The Job Done

Installing timing components is not cheap, fast, or easy. It can be a complicated and expensive proposition. Having all of the correct components at hand to complete a timely repair is essential. Beck/Arnley timing kits can provide those timely organized essential repairs with a single purchase accelerating pull time from shelf to job site and installation.

## GASKETS

Head Gaskets, Oil Pan Gaskets, Valve Cover Gaskets, Intake/Exhaust Gaskets, Timing Kit Gaskets, Misc. Gaskets

- The labels on our gasket packaging are color coded for easy identification.
- They are packaged in see-through plastic shrink-wrap, so you know exactly what you are getting.
- All sets have only the parts that you will need for your specific make/model! The only consolidations made are those implemented by the OE's.
- Latest head gasket technology including multi layer steel (MLS).
- Precise engineering design for each specific engine requirement.

# Cooling Systems and ELECTRICAL

Beck/Arnley Cooling & Electrical products, manufactured with top grade materials, are available for import applications serviced by today's technicians, including late models. Beck/Arnley provides a perfect fit every time.

## COOLING SYSTEMS

### Water Pumps

- Beck/Arnley offers a full line of new water pumps for import applications.
- Our water pumps come with all necessary gaskets and seals.
- We recommend replacing the coolant to prevent heating problems. Approximately 50% of engine problems are a result of improper coolant use that can be avoided with proper maintenance and replacement of critical components.

### Thermostats

- Accurate per temperature specific to make/model/year/engine
- Thermostat includes gasket or O-ring where applicable
- Quality construction for long life and accurate performance
- Precise metering of coolant flow for maximum cooling efficiency

## ELECTRICAL

### Switches

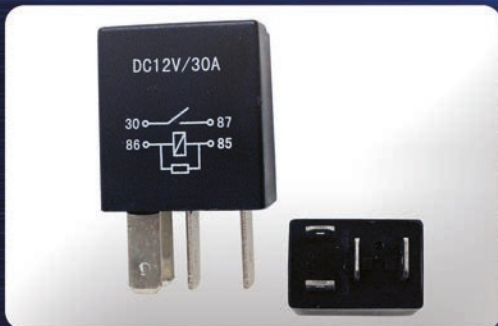

- OE Quality for optimum operation and long life
- Connections match per application – no modifications

Various switches available:

- o Combination
- o Brake Light
- o Oil Pressure
- o Water Temperature
- o Wiper
- o Ignition
- o Thermo Fan
- o Outside Mirror
- o AT Conductor Plate

### Relays

- Specific to Application
- OE Quality, no modifications

# Foreign Branded FRICTION

The Original Import Brand Since 1914

## BECK/ARNLEY®

GENUINE Foreign Nameplate Parts

Beck/Arnley is known as the import brand supplier of premium, quality parts for import cars, light trucks and SUVs. Now, Beck/Arnley has developed an innovative line of high quality OE Quality Fluids, specifically for Asian & European vehicles.

Formulated using the same technology that OEMs use, Beck/Arnley's comprehensive line of OE Quality Fluids provide the same great quality used by the OEMs.

This advanced line includes:

- 💧 Premium OE Quality Coolants
- 🔥 Premium OE Quality ATFs
- 🌱 Premium OE Quality CVTF
- 💧 Premium OE Quality Hydraulic Fluid
- 🔥 Premium OE Quality Motor Oil
- 🚗 Premium OE Quality Power Steering
