rein[®]
AUTOMOTIVE

For over 50 years, CRP has been a leading source of OE quality replacement parts in North America. **Rein Automotive** genuine parts and accessories is part of the CRP family of brands. Rein offers a wide range of OE-quality replacement parts with over 1,700 SKUs for European import vehicle applications. From motor mounts to suspension parts to wheel bearing kits, and coolant hoses, **Rein Automotive** parts are correct in form, fit, and function. As the respected partner of ContiTech belts, Pentosin fluids, and AJUSA gaskets and engine components, we are proud to offer the **Rein Automotive** program which has come to stand for quality and reliability.

Catalog Disclaimer

CRP's Rein Automotive Master Catalog is intended to assist you in obtaining OE-quality replacement parts.

We have made every effort to assure the accuracy of the information provided in this Application Guide. CRP Automotive (aka CRP Industries Inc.) assumes no responsibility for any loss or damage due to errors or omissions.

All references to part numbers, vehicle models, and manufacturers are supplied for informational purposes only and are not intended to imply any affiliation with or approval by the vehicle manufacturers.

REIN AUTOMOTIVE REPLACEMENT COMPONENTS

WHEN IT COMES TO QUALITY REPLACEMENT COMPONENTS, IT'S REIN OR NEIN

When replacing components like control arms, wheel bearings, motor mounts, and coolant hoses, quality equals safety.

After all, if a part breaks prematurely due to improper form, fit, or function – a lot more than the installer's reputation is at stake. The vehicle's driver and passengers could be at risk. And as even base model cars get heavier and more powerful, quality and durability becomes increasingly important.

By choosing Rein Automotive genuine replacement parts for your undercar needs, you are assured of quality. The word "Rein" means "pure" in German, so you can be confident our parts work as well as the parts they are replacing, if not better. What's more, our commitment to quality doesn't stop with our parts. It continues with our processes, which are ISO 9001:2008 certified.

The Rein Automotive line currently offers over 1,000 SKUs for a wide variety of import applications including Audi, BMW, Mercedes-Benz, MINI, Porsche, Saab, Volkswagen, and Volvo vehicles. And it will continue to grow.

Here are just some of the parts categories available under the Rein Automotive umbrella:

A/C COMPONENTS

- Condensers
- Evaporators & Evaporator Kits
- Receiver/Driers

ANTI-VIBRATION

- Engine Mounts
- Strut Mounts & Bushings
- Transmission Mounts

COOLANT HOSES

CV BOOT KITS

FIRST AID

SUSPENSION COMPONENTS

- Boots & Boot Kits
- Camber Struts
- Control Arms
- Steering Rack Boots
- Sway Bar Links
- Tie Rods

BEARINGS & BEARING KITS

- Clutch Release Bearings
 - Differential Bearings
 - Driveshaft Bearings
 - Wheel Hubs
 - Wheel Bearings & Wheel Bearing Kits
-

REIN AUTOMOTIVE A/C COMPONENTS

There may be nothing worse for a technician than an A/C part that isn't correct in form, fit and function. The "closed loop" construction of an A/C system means you've got to put everything back together before you can test it. If the replacement part doesn't work, that's a serious investment in labor which you've just wasted.

To help save you time, all Rein OE-quality evaporators and condensers are pressure tested before leaving the factory – so they're guaranteed to work the first time. And Rein evaporator kits come with an OE expansion valve already mounted, for even more time saving. So make Rein Automotive parts your first choice for Audi, BMW, Mercedes, Porsche, Saab, Volvo and VW vehicles from 1985 to the present. In addition to Evaporators and Condensers, our current A/C program includes Cabin Air Filters, Evaporator Kits, Expansion Valves, Hose Assemblies, O-rings, and Receiver/Driers, as well as Switches and Sensors.

AIR CONDITIONING PREFIX LISTING

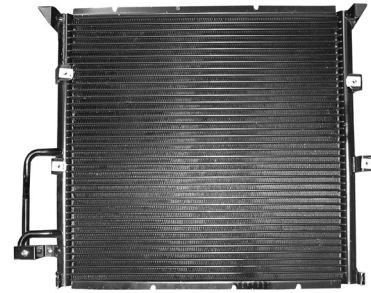

PREFIX	PART TYPE	PREFIX	PART TYPE
ACB	AC Blower/Regulator	ACR	AC O-Ring
ACC	AC Condenser	ACS	AC Switch/Sensor
ACD	AC Receiver Drier/Accumulator	ACV	AC Heater Valve
ACE	AC Evaporator	ACX	AC Expansion Valve
ACH	AC Hose Assembly		
ACK	AC Evaporator Kit		
ACM	AC Miscellaneous Components		

REIN AUTOMOTIVE CONDENSERS

OE SAMPLE OF ACC0040P

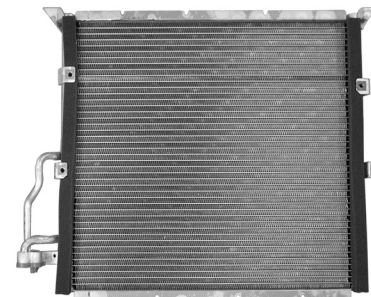

Designed to fit and function to the highest HVAC performance requirements for today's vehicles. This Parallel Flow Type Condenser is the new standard for condensers.

With this parallel flow design, heat is dissipated much more efficiently. The AC system cools much better at lower pressures, with less of a demand on the compressor.

REIN AUTOMOTIVE SAMPLE ACC0040R

Designed to fit and function as well as the OE unit at a fraction of the price. Before any Rein Automotive Condenser is approved for delivery, it is inspected to make sure it matches the OE version in fit, form, and function.

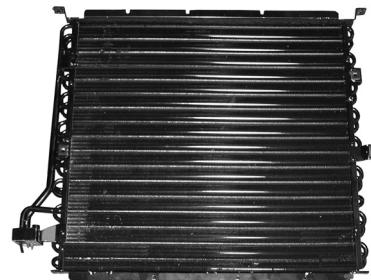

COMPETITOR'S SAMPLE

Designed to fit as well as the OE unit.

While these aftermarket condensers may fit as well as the OE unit did, the old type tube and fin cooling design does not transfer enough heat to keep up with the demands of newer AC systems.

This less expensive alternative could end up costing you more. Here's why:

- Poor HVAC system performance
- Condenser failure because the part cannot meet the new HVAC system requirements
- An unhappy customer translates to rework for your shop and fewer customer referrals

REIN AUTOMOTIVE EVAPORATORS AND EVAPORATOR KITS

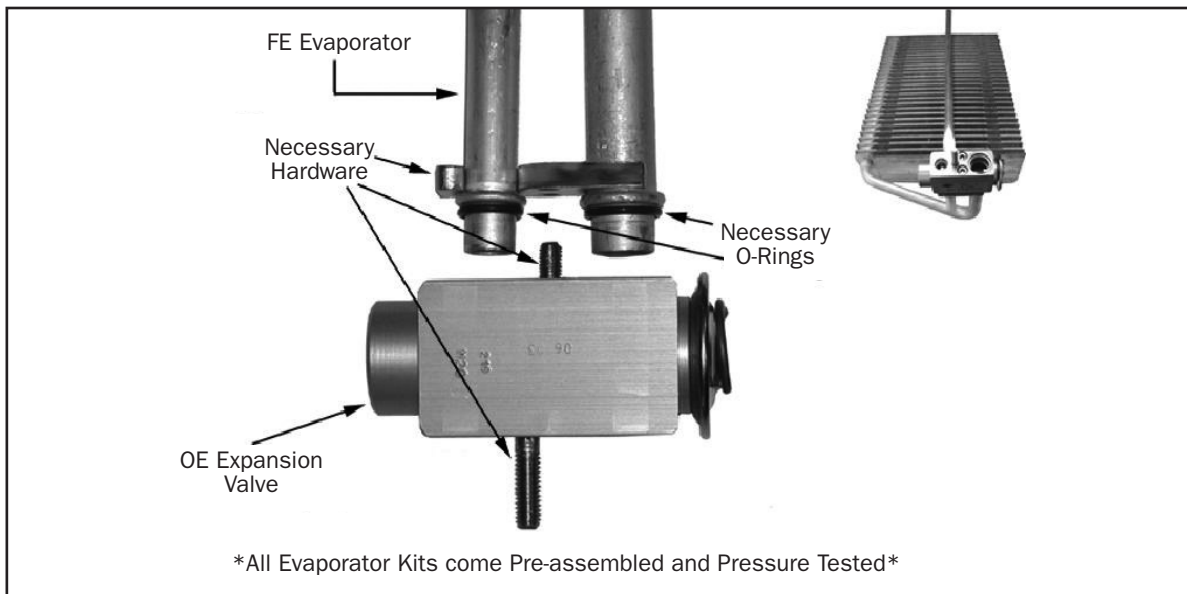

Rein Automotive Evaporators and Evaporator Kits offer a cost-effective solution to evaporator replacements.

ALL REIN AUTOMOTIVE EVAPORATORS ARE:

- Designed according to OE specifications, ensuring fit and function are identical to the original evaporator.
- Pressure tested after manufacturing to ensure proper function.

ALL REIN AUTOMOTIVE EVAPORATOR KITS ARE:

- Fitted with expansion valves only from OES suppliers.
- Designed and tested in the same manner as OE evaporators.
- Delivered by the factory with the correct expansion valve, pre-mounted and pressure tested to ensure a oper installation (see below).

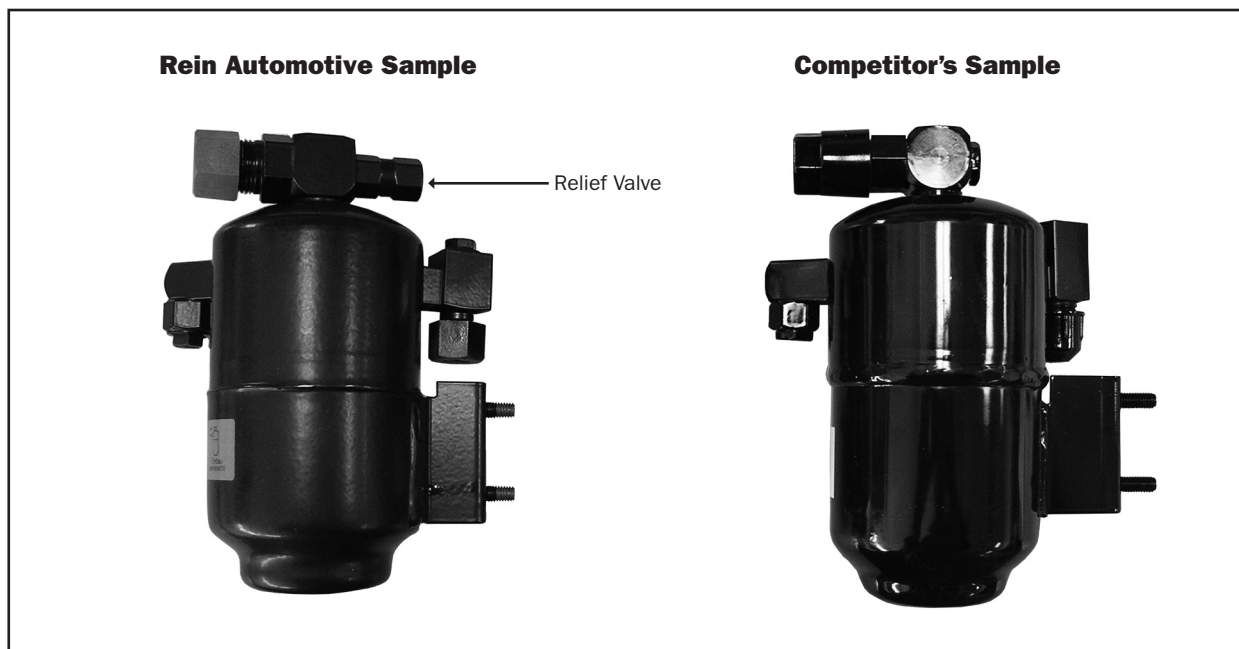

REIN AUTOMOTIVE RECEIVER/DRIERS

All Rein Automotive Receiver/Driers are designed according to OE specifications ensuring fit, form, and function are identical to the original equipment receiver/drier.

WHAT MAKES REIN AUTOMOTIVE RECEIVER/DRIERS IDENTICAL TO OE RECEIVER/DRIERS?

- If the OES manufacturer fits a high pressure safety valve, the equivalent Rein Automotive Receiver/Driers will also be fitted with the valve.
- If the OES manufacturer fits a sight glass, the equivalent Rein Automotive Receiver/Driers will also be fitted with a sight glass.
- All Rein Automotive Receiver/Driers are pressure tested after manufacturing to ensure high quality.

Pictured below is a Rein Automotive Receiver/Drier and a competitor's receiver/drier. The Rein Automotive version has the high pressure relief valve where the competitor's does not. If pressure gets too high in the system, the Rein Automotive valve would release the pressure. The competitor's receiver/drier, without the valve, would not be able to reduce the pressure build-up potentially resulting in costly damage to the AC system.

ANTI-VIBRATION PARTS KEEP NEARLY EVERYTHING IN A CAR (INCLUDING THE DRIVER AND PASSENGERS) RUNNING SMOOTHLY

Sometimes categorized as “rubber-to-metal” products, anti-vibration parts include strut mounts, engine mounts, and transmission mounts. Their job is to dampen vibration, reduce or isolate noise, and keep related components properly positioned. Though largely hidden from view, anti-vibration parts play an important role in the handling and safety of an automobile.

For example, if a motor or transmission mount isn’t manufactured to the correct hardness, it can increase the NVH (noise, vibration, and harshness) characteristics of a vehicle to unacceptable levels, or worse yet, fail prematurely. This leads to call-backs and erosion of your valuable reputation.

Rest assured that Rein Automotive anti-vibration parts are identical to OE parts in form, fit, and function — meaning that they will perform exactly as intended, minimizing call-backs and returns.

Rein Automotive offers a broad selection of anti-vibration parts for Audi, BMW, Mercedes-Benz, MINI, Porsche, Saab, Volkswagen & Volvo vehicles. Part categories include:

- Control Arm Bushings
- Engine Mounts
- Transmission Mounts
- Subframe Mounts
- Strut Mounts

ANTI-VIBRATION PREFIX LISTING

PREFIX	PART TYPE
AVA	Anti-Vibration Absorber/Buffer
AVB	Anti-Vibration Bushing/Set
AVD	Anti-Vibration Differential Mount
AVE	Anti-Vibration Engine Mount
AVL	Anti-Vibration Vehicle Lift Pad
AVM	Anti-Vibration Miscellaneous Mount
AVP	Anti-Vibration Spring Pad
AVQ	Anti-Vibration Strut Mount/Kit
AVR	Anti-Vibration Engine Torque Rod
AVS	Anti-Vibration Driveshaft Mount
AVT	Anti-Vibration Transmission Mount
AVX	Anti-Vibration Suspension Bump Stop
AVZ	Anti-Vibration Suspension Bump Stop

REIN AUTOMOTIVE SUSPENSION COMPONENTS

OUR QUALITY SUSPENSION PARTS HELP CUSHION YOUR BUSINESS FROM UNWELCOME BUMPS

Shocks and springs aren't the only components of a vehicle's suspension system. There are dozens of related parts that are critical to the proper operation and control of a vehicle.

It's the job of suspension components to keep a vehicle's tires in contact with the road surface. So it should be no surprise that these components are subject to some of the most brutal forces on the road. Even a simple pothole or curb, hit at the wrong speed or wrong angle, can mean broken or damaged control arms or camber struts.

The potential for damage makes it so very important that replacement suspension components have the same form, fit, and function as the parts with which a vehicle was originally built. Just like every part that carries the Rein Automotive name.

Rein Automotive offers a program of suspension components, for BMW & Mercedes-Benz vehicles from 1989 onward. What's more, thanks to our relationships with numerous OE quality suppliers, Rein Automotive is very often the first to market with fitments for many European models.

Here is a partial list of the types of suspension components available under the Rein Automotive name:

- Ball Joints
- Camber Struts
- Control Arms
- Sway Bar Links
- Tie Rods

SUSPENSION COMPONENT PREFIX LISTING

PREFIX	PART TYPE
SCA	Suspension Control Arm/Strut
SCB	Suspension Ball Joint
SCE	Suspension Tie Rod End
SCI	Suspension Inner Tie Rod
SCJ	Suspension Ball Joint Kit
SCL	Suspension Sway Bar Link
SCT	Suspension Tie Rod

REIN AUTOMOTIVE BOOTS & BOOT KITS

OUR BOOT KITS COME WITH EVERYTHING NEEDED TO PERFORM SERVICE PROPERLY THE FIRST TIME

Rubber and thermoplastic boots are exposed to some of the worst conditions faced by any automotive part. High RPMs combined with road debris and exposure to the elements, accelerate wear and tear. And when a boot fails, the joint it protects will soon follow — a repair that can cost hundreds of dollars.

Replacing a cracked or torn boot with a quality equivalent from Rein Automotive is a much more affordable solution. What's more, all of our cv boot kits come with every single part an installer needs to replace it right the first time, without having to order any additional items like clips, spacers, or straps. Plus all Rein Automotive kits come with an ample supply of OE grease.

In keeping with our philosophy of correct form, fit, and function, Rein Automotive offers only OE-quality boots — with an exact sizing for every listed import fitment. We do not offer universal boots that can be “sized” at the time of repair. At Rein Automotive, we simply don't believe that universal boots offer the durability your customers are counting on from you.

Rein Automotive currently offers a program of boots and kits for Audi, BMW, Mercedes-Benz, MINI, Porsche, Saab, Volkswagen & Volvo vehicles.

REIN AUTOMOTIVE COOLANT HOSES

Rein Automotive Coolant Hoses are designed to be a direct replacement for OE hoses and hose assemblies. This means, if the OE hose has multiple branches, the Rein equivalent will have the same number of branches in the correct sizes and correct locations. If the OE hose has thermoplastic “Quick Connect” fittings, the Rein Automotive hose will also have these fittings.

The Rein Automotive Coolant Hose Program is currently more than 350 SKUs strong.

BOOT & BOOT KIT PREFIX LISTING

PREFIX	PART TYPE
BKB	Axle Boot
BKK	Steering Boot Kit
BKL	Long Axle Boot Kit
BKN	Axle Boot Kit
BKP	Steering Boot
BKS	Short Axle Boot Kit

COOLANT HOSE PREFIX LISTING

PREFIX	PART TYPE
CHE	Engine Coolant Hose
CHH	Heater Hose
CHK	Radiator Coolant Hose Kit
CHR	Radiator Coolant Hose

REIN AUTOMOTIVE WHEEL BEARINGS & KITS

OUR WHEEL BEARINGS HAVE A PROPER FIT, SO YOU DON'T

Wheel bearings, which support a vehicle's wheels and allow them to spin freely, contribute significantly to the economy, safety, and quiet operation of a vehicle. A worn or defective wheel bearing can be noisy, hot, and even affect fuel consumption or proper vehicle handling.

Rein Automotive carries only OE-quality wheel bearings and wheel bearing kits for Audi, BMW, Mercedes-Benz, Volkswagen & Volvo vehicles from 1989 to the present.

Besides the highest quality bearings and races, Rein Automotive kits include every part needed to replace the bearings properly the first time. All required grease, nuts, circlips, seals, washers, gaskets, split pins, collars, o-rings, and shims are provided — saving installers time and money on every installation.

Rein Automotive also offers the following related parts with the same OE-quality form, fit, and function as our wheel bearings:

- Clutch Release Bearings
- Differential Bearings
- Drive Shaft Bearings
- Wheel Hubs

REIN FIRST AID

Rein Automotive now offers a First Aid Program. This program is made up of problematic parts that need to be replaced more often. These problematic parts have a high failure rate on some vehicles. The program guarantees you'll always have the parts professional repair technicians frequently need to replace.

Stay tuned as the First Aid Program is going to grow substantially over the next year.

BEARING & BEARING KIT PREFIX LISTING

PREFIX	PART TYPE
BEH	Wheel Hub/Wheel Hub Bearing
BEL	Long Wheel Bearing Kit
BEM	Miscellaneous Bearing
BES	Short Wheel Bearing Kit
